## 2. INTRODUCTION

This document is not a prospectus. It was constituted for informational purposes only, in order to present One Bond's products. No purchase is necessary. You are free to take part in the project or not.

### 2.1 WHO WE ARE?

Wish Group is a fast growing investment company in the world of international finance and investment. With global presence we have established ourselves as a premier investment group dedicated to delivering superior returns and fostering sustainable growth across diverse markets.

At Wish Group, our mission is clear: to strategically allocate capital, harnessing our deep market insights and expert analysis to identify lucrative opportunities that maximize value for our clients and partners. With a proven track record of success, we specialize in navigating complex financial landscapes, offering tailored solutions that align with our clients' unique objectives and risk profiles.

Driven by innovation and a steadfast commitment to excellence, we pride ourselves on our ability to adapt swiftly to evolving market dynamics while upholding the highest standards of integrity, transparency, and accountability. Our seasoned team of professionals brings together a wealth of experience and expertise, ensuring meticulous due diligence and rigorous investment management practices.

As a trusted steward of capital, we embrace diversity and collaboration, cultivating lasting relationships built on trust and mutual respect. Whether you are seeking growth opportunities, portfolio diversification, or strategic guidance and achieve financial success.

OBC (One Bond Coin) is the first crypto product offered by Wish Group. We currently backed up by a team of professionals from all over the world who have a common goal: improving global financial services by simplifying the use of crypto currency in a manner that everybody can easily integrate it in their life. In other words, we are here to change the financial world as we currently know it.

## 2.2 Message from the CEO

Motivated by our willingness to meet the members' expectations, we can affirm today with pride that OBC (One Bond Coin) will have a major impact on the crypto currency world. We are focused on our mission more than ever. We want to make the crypto currency technology accessible to all by simplifying its management and use to the maximum. The banking sector and the finance world will have to converge to the crypto currency path in the near future.

In order to achieve our goal, we rely on five strategical linchpins. According to us, they are essential for success and growth. Here they are:

- Ensure that our members live the best experience;
- Distinguish ourselves by offering unique and effective quality products and services;
- Deploy our unique strategy, which is doing things differently;
- Surround ourselves with the most talented team;
- Access some financial flexibility in order to invest in our most promising projects.

We are proud to tell to each member that they are at the heart of every decision of the company. We always go the extra mile for our customers. At the decentralization and crypto currency era, we are fully engaged in connecting with our members, wherever they are.

It is a fact that applies to each of our products! OBC (One Bond Coin) will keep on growing by focusing on client satisfaction, on the talent of its employees, on innovation and on the performance of its products.

# OUR MISSION & VISION

## OUR MISSION

OBC (One Bond Coin) is a company founded by and is made up of entrepreneurs and finance professionals with a strong desire to change the financial world that we live in today by simplifying to the maximum the access to crypto currency, the future's currency. Its mission is to increase the number of possible uses and to increase its number of users by streamlining its management process. We are here to provide you with the option to use your money the way you want to, without having to pay astronomical fees to international banks, which already have the monopoly since a long time. We must go the opposite way. It is our main engagement and the reason why we work day in and day out. We will advocate for this mission until it is accomplished, and until our members are fully satisfied with our products.

## OUR VISION

Our vision is to create a cutting-edge crypto currency coin website that serves as the ultimate resource hub for enthusiasts, investors, and developers alike. We aim to be a beacon of knowledge and innovation in the rapidly evolving world of digital currencies, offering insightful analysis, real-time data, and comprehensive educational content.

Through our platform, we seek to empower users with accurate and up-to-date information on a wide range of crypto currencies, enabling informed decision-making and fostering a deeper understanding of block chain technology. We envision a community-driven space where ideas flourish, projects thrive, and collaboration drives meaningful progress in the global crypto currency ecosystem.

With a commitment to transparency, security, and user-centric design, our goal is to establish a trusted platform that inspires confidence and facilitates seamless interaction for users at every level of expertise. By staying at the forefront of technological advancements and industry trends, we aspire to shape the future of finance and contribute to the widespread adoption of crypto currencies worldwide.

## OUR MOTIVATION

Why are we doing all of this, exactly? Our main motivation is to provide absolute financial independence. We will give you the possibility to Free yourselves from unnecessary financial clutches.

We are motivated to change the banking sector and the finance world. We are convinced that we will achieve our goal. The best way to predict the future is to create it.

### 2.5 OBC (ONE BOND COIN) INTRODUCTION

#### OBC - THE GAME CHANGER!

Innovation is terrifying, but crypto currency is there for the long haul and to change the world. We already observe this phenomenon.

We notice an increase in the number of companies from different sectors that are taking their first steps towards adopting the block chain technology. They understand that it is pressing to be ahead of the competition.

The technological demand related to the block chain for the financial services sector increases at the global level and mostly in developing countries. Various countries from Latin America, Southeast Asia and Africa issue strict regulations on currency control, and consumers are turning to other solutions rather than to traditional financial institutions.

In terms of entrepreneurship initiatives, a tendency is emerging in recent years.

Crypto currency transforms the world. It will create an unprecedented positive social impact. You may decide to watch the train go by, or you may take part in a historical moment and support us in this journey.

OBC (One Bond Coin) is a crypto currency (private Internet monetary currency) that has a value based on the current market. In other words, **OBC**

(One Bond Coin) is an entirely decentralized open code global currency. Your transactions will not be managed or monitored. The users can now anonymously control their own finances.

OBBC's (One Bond Coin) transactions (deposit, withdrawal, purchase, sale, transfer) are confirmed more rapidly and have enhanced storage efficiency.

OBBC's (One Bond Coin) revolutionary operational structure is safer than that of current crypto currencies and is a lot simpler to use.

OBBC (One Bond Coin) will be used just like traditional money to pay bills or on the market to buy, sell or exchange for other currencies in future.

OBBC (One Bond Coin) has one goal, and its team will never lose sight of it. We do not compare ourselves to others.

### The Future

OBBC (One Bond Coin) projects and ideas on short, medium and long terms are ambitious and bold. Our priority is to make crypto currency accessible to everybody. We must inform people on the operating process of this new technology. We also must reassure people about publications found on the

Internet that scorn crypto currency. Using OBC (One Bond Coin) is as convivial, if not more, than using a traditional credit card.

Having the possibility to transfer an amount to someone without any delay or fees or make your daily purchases without depending on a bank that controls your money by imposing transaction limits and unreasonable fees is the vision of the future of the financial world of the OBC Corps group and of the OBC (One Bond Coin) crypto currency.

## 2.6 WHY OBC20 ONE BOND?

One Bond is a decentralized exchange protocol allowing for the creation by the users of smart contracts thanks to a Turing complete language. These smart contracts rely on a computing protocol that recognizes the verification or the application of a mutual contract. They are deployed and available for public consultation on the block chain.

One Bond uses a denominated count unit called Bond as the payment method for these contracts. The corresponding acronym used on exchange platforms is OBC.

An OBC20 token is no different from any other token, it just happens to comply with One Bond's token standard. Why would One Bond need a token standard? Interoperability. If all tokens created on the One Bond network use the same standard, those tokens will be easily exchangeable and be able to immediately work with Dapps, that uses the OBC20 standard.

A token is "standardized" when it uses a certain set of functions. If developers are aware of how a token operates, they can easily integrate it into their projects with a reduced fear of bugs or errors. If multiple tokens behave similarly, operating the same functions in the same way, a Dapp can then easily interface with different sub-currencies.

The OBC20 token standard describes the functions and events that an One Bond token contract has to implement

## **2.7 OBC (ONE BOND COIN) CONTRACT ADDRESS**

When own block chain is launched in future the confirmed and verified OBC Coin (One Bond Coin) smart contract can be consulted on our official website:

0xaf4d728acf0d5e489c551fe342cbbb79976ab8be

As shown in the token configuration:

- ② Total supply: 2,000,000,000 OBC (One Bond Coin)
- Token decimals: 18

Our contract was created in the simplest way possible, in order to reduce the transaction delays. The simpler the contract, the faster the process. Our technical team designed it to get the desired results.

## **3. ABSTRACT OF OUR UPCOMING PROJECTS**

We will eventually comprise multiple products related to the Crypto and financial field. We will explain briefly them hereunder.

### **1. OBC WALLET**

In future OBC Wallet will be available on PC, on MAC and as a mobile application that you may download from the App store or from Google Apps. OBC Wallet will give you the freedom to manage your funds, to transfer funds, to buy or sell OBC (One Bond Coin), to transfer funds to your contacts or to even pay your bills.

This upcoming wallet is fully decentralized and secured. This will be audited and certified by third party auditors.

**SMART MONEY, SMART WALLET**

The OBC Wallet is a gateway to decentralized applications on the One Bond block chain. It allows you to hold and secure OBC (One Bond Coin) and other crypto-assets built on OBBC (One Bond Block Chain), as well as write, deploy and use smart contracts.

## **2. (OBBC) ONE BOND BLOCK CHAIN TECHNOLOGY (IN FUTURE)**

**Build unstoppable applications**

OBBC (One Bond Block Chain) is a decentralized platform that runs smart contracts: applications that run exactly as programmed without any possibility of downtime, censorship, fraud or third-party interference.

These apps run on a custom built block chain, a very powerful shared global infrastructure that can move value around and represent the ownership of property. This enables developers to create markets, store registries of debts or promises, move funds in accordance with instructions given long in the past (like a will or a futures contract) and many other things that have not been invented yet, all without a middle man or counterparty risk.

On traditional server architectures, every application has to set up its own servers that run their own code in isolated silos, making data sharing hard. If a single app is compromised or goes offline, many users and other apps are affected. On a block chain, anyone can set up a node that replicates the necessary data for all nodes to reach an agreement and be compensated by users and app developers. This allows for the user's data to remain private and apps to be decentralized like the Internet was supposed to in the first place.

## **3. DECENTRALIZED SOCIAL MEDIA APPLICATION DEZTA**

DEZTA application will be redefining social media through decentralization. Our platform represents a revolutionary approach to connecting people globally while prioritizing privacy, security, and user empowerment.

We believe in putting control back into the hands of our users. Through decentralized technology, every interaction, from posting content to engaging with communities, is secured by block chain principles. This ensures transparency, immutability, and censorship resistance, safeguarding user data and content ownership.

Our vision goes beyond traditional social networks. We envision a community-driven ecosystem where users dictate the platform's direction through decentralized governance. This empowers individuals to participate in decision-making processes and shape the future of social media.

### 3.4 OBC EXCHANGE (EXALLONE)

At OBC's Exallone, we empower you to delve into the exciting world of crypto currencies with ease and confidence. Whether the user is a seasoned trader or just getting started, our platform offers a secure and intuitive way to buy, sell, and trade digital assets.

**Secure and Trusted:** Security is our priority. We implement industry-leading measures to protect your funds and personal information.

**User-Friendly Interface:** Navigate our platform effortlessly. From beginners to experts, our interface is designed to be intuitive and efficient.

**Wide Range of Crypto currencies:** Explore a diverse selection of crypto currencies. We support a variety of assets to suit the trading preferences.

**Competitive Fees:** Enjoy transparent and competitive fees. We believe in fair pricing that benefits our users.

**24/7 Support:** Have questions or need assistance? Our dedicated support team is available around the clock to provide timely help.

We employ robust security protocols, including encryption and cold storage, to safeguard your funds.

### 3.5 OBC BANK

Here is our most important product; the one that will change the way people perceive and use the current banking system. We will be launching OBC

Bank in future which will offer you to manage all your favourite crypto currencies in a single place.

Obviously, your OBC Card will also be connected to your bank account to manage payments and to manage received purchase bonuses. The most important OBC Bank innovation will be the crypto currency securities.

### **3.6 OBC CARD**

Revolutionary and unprecedented, in future we will be launching OBC Card which will be accepted everywhere in the world, regardless of your country's currency. Your card will adapt to the geographical area in which you are located. OBC Card will be linked to your OBC Wallet and to your OBC (One Bond Coin). When you make a purchase with the card, our system will target the best available exchange rate and will debit your account of the exact OBC (One Bond Coin) amount corresponding to your purchase in order to confirm the transaction.

You will be the only one to control your finances. We unceasingly repeat that no person or company will be able to consult your transactions.

### **3.7 OBC (ONE BOND COIN) UTILITIES / USE OF OBC**

We delve into the practical applications of OBC (One Bond Coin). From their fundamental role as decentralized mediums of exchange facilitating secure and borderless transactions, to their utilization in decentralized finance (DeFi) platforms for lending, borrowing, and earning yields, crypto currencies are reshaping the financial landscape.

Moreover, OBC's (One Bond Coins) are powering the emergence of non-fungible tokens (NFTs), revolutionizing digital ownership, art, and collectibles. They also facilitate seamless cross-border payments, enabling faster and more cost-effective remittance solutions compared to traditional methods.

Beyond finance, block chain technology and OBC's (One Bond coins) are being leveraged in sectors such as resorts, commodities trading, gaming, real

estate, etc., where their transparency, security, and efficiency drive innovation and operational improvements.

### 3.8 SOCIAL NETWORKS

It is important to explain OBC's (One Bond Coin) marketing strategy. Unlike other ICOs, we focused our efforts on Social networks.

Our social network campaign targeted a larger people from all over the world, every day. We targeted mostly men and women from 18 years of age to 65 years old through our own marketing clubs present in every region and major cities across the world.

Unlike a Google advertising placement, which only aims at people who research on crypto currency, our campaign targets people who are susceptible to like our page, thus people who have already seen or read an article on crypto currency or who talked about it with their friends. Our mission is to make OBC (One Bond Coin) known to the highest number of people possible. Social Network campaign is then our main ally.

An additional strategy was a simple contest in which we allowed people to invite their friends to also participate. We then through a lucky draw a winner will be selected for cash prize.

Another very successful strategy was referencing for a bonus on purchases. When subscribing, each member had a unique link that they could share with their friends and have the chance to get bonus of all the purchases made by the referred people in addition to bonus on their own purchases.

Therefore, we plan to continue our expansion through Social Network.

Various people criticized the fact that we were not on large ICO websites. Did you know that they ask for a huge amount to display our company?

We do not think that it is necessary to spend that much money for this purpose. Once again, we are different.

### **3.9 OBC (ONE BOND COIN) UPCOMING PROJECTS TIMELINES**

Following are the upcoming projects and timelines related to the OBC (One Bond Coin) project:

Project	Timeline
One Bond Wallet	1st Quarter of 2025
One Bond Block Chain	3rd Quarter of 2025
DEZTA – Social Media App	1st Quarter of 2026
One Bond Exchange (Exallone)	4th Quarter of 2026
One Bond Bank	2nd Quarter of 2027
One Bond Card	4th Quarter of 2027

We are convinced of the potential of OBC (One Bond Coin) and of its products. We truly believe that it could outpace all other leading crypto currency Coin over the next years. OBC (One Bond Coin) could become the main exchange crypto currency and the most used one in the world.

The only solution to this extravagant ambition is to make ourselves known and for OBC (One Bond Coin) to be used by the general public. In order to do that, we need OBC (One Bond Coin) to be user-friendly and highly convenient.

## 4. TOKENOMICS

DETAILS	ALLOCATION		BREAK DOWN DETAILS OF INTERNAL ALLOCATION	
	NO OF TOKENS ALLOCATED	%	NO OF TOKENS ALLOCATED	%
Total Supply	2,000,000,000	100%	-	-
Token Sale	1,000,000,000	50%		
- Private Sale	-	-	200,000,000	10%

Ecosystem Development	200,000,000	10%	-	-

## 5. CONCLUSION

We hope that this white paper allowed you to get a grasp of OBC's (One Bond Coins) mission and the company's products. We also hope to have answered every question you might have had.

We attempted to explain each point in a clear way, without exaggerating on the document's length. Should you have any interrogation, please communicate with our client service team at [info@onebond.org](mailto:info@onebond.org).

## 6. CONFIDENTIALITY, TERMS & CONDITIONS AND DISCLAIMER:

### TERMS AND CONDITIONS

This document is not a prospectus. It was created with the sole purpose of information, to explain OBC products. The risk and reward for the purchase will be with the purchaser. OBC disclaims any responsibility mentioned in this document and commits to comply with the laws outlined hereunder.

#### Confidentiality

Confidentiality is paramount in our OBC white paper. We recognize the importance of safeguarding sensitive information, intellectual property, and the privacy of our stakeholders. Our commitment to confidentiality is reflected in the following principles:

- a. Protection of Intellectual Property Rights: We outline our project's innovative solutions, proprietary technology, and strategic insights while ensuring their confidentiality. Measures are in place to prevent unauthorized access, replication, or misuse of our intellectual property.
- b. Secure Data Handling: Any personal or sensitive data referenced in the white paper, such as user information or transaction details, is handled with rigorous security protocols. We employ encryption methods and secure storage solutions to mitigate risks associated with data breaches.
- c. Limited Disclosure: While transparency is key, certain details essential to our competitive advantage or strategic positioning may be withheld or generalized to maintain confidentiality. This approach safeguards our project's unique value proposition and market relevance.
- .

- d. Compliance and Accountability: We adhere to regulatory requirements and industry standards concerning data protection and confidentiality. Our practices ensure accountability to our stakeholders, promoting trust and transparency in our operations.
- e. Commitment to Privacy: Beyond the white paper, we prioritize the privacy rights of our community and stakeholders. We uphold strict confidentiality principles in all interactions and engagements, respecting individuals' privacy preferences and data security concerns.

## Disclaimer

The following disclaimer is included in our crypto white paper of OBC to clarify the terms of engagement and inform stakeholders about the inherent risks and uncertainties involved in crypto currency investments:

- a. Risk Disclosure: Investing in OBC involves inherent risks, including but not limited to market volatility, regulatory changes, and technological risks. Prices of OBC can fluctuate and are subject to market risks.
- b. No Financial Advice: The information provided in this white paper is for informational purposes only and should not be construed as financial, legal, or investment advice. No binding agreement can be created through this document with any other third party.
- c. Forward-Looking Statements: Statements in this white paper regarding future events or developments are forward-looking and based on our current expectations. Actual results may differ materially from those anticipated in these statements due to various factors beyond our control.
- d. Technology Risks: Our project relies on emerging block chain technology, which is subject to unforeseen technical risks and network disruptions.
- e. Regulatory Considerations: Crypto currency regulations vary by jurisdiction and may impact the legality of our project's operations or the value of our tokens. We strive to comply with applicable laws and regulations but cannot guarantee regulatory certainty.
- f. Token Utility: The utility of our tokens within our platform may be affected by changes in market demand, technological developments, or regulatory actions. Token holders should be aware of the potential impact on token value and usability.
- g. Updates and Amendments: This white paper may be updated or amended periodically to reflect project developments, market conditions, or regulatory requirements. Stakeholders are encouraged to review the latest version for accurate information
